

# Bringing HR & Payroll Together in a unified technology.

By bringing the essential functions of payroll and HR together, isolved simplifies your people management. All critical functions are in the single People Cloud database. No more exporting, importing or clunky integrations. isolved doesn't stop there. It easily scales to include Talent Management, Workforce Management, and Engagement Management. It's designed to help you manage, strengthen, and compensate your workforce. **No hassles.**

## Dashboard

isolved starts with your Dashboard. Here is the command center that allows you access to all other parts of isolved.

## Payroll Preview

isolved's full payroll preview puts you in control, alerting you to potential errors before you process. Plus, the system will calculate taxes with no headaches - even in multi-state situations or where you have complicated, layered local tax rates.

## Human Resources

The HR section of isolved is the central location in managing your employees from hire to retire, including documentation, awards, education, disciplinary actions, OSHA incidents and company assets.

With isolved, you now have a connected platform designed to delight your people that can do it all.

*Transforming employee experience for a better today and a better tomorrow.*
